WILL DE LA VEGA

OBJECTIVE

"Talented individual with strong organizational skills, a team player and most of all someone who loves his work, seeking for a Full Stack developer position where I can apply 15 solid years of experience to create state of the art software solutions following best practices and design patterns to enhance the reputation of the company."

KEY HARD SKILLS

— **NodeJS backend development using NestJS and Express.**

— **ASP.NET** Core with Visual Studio for Mac and Visual Studio Code.

— Solid knowledge and experience with Typescript programming in **Angular**, **React** and **Node**.

— Design and implementation of database design (**SQL Server** and **MySQL**) and also experience with **NO-SQL** Systems.

— Working Experience with *GraphQL* and **Apollo**, as well as implementing **micro—services in NestJS (Node) and .NET**.

— Project management with **Kanban** boards and **Jira** software.

— Git, Github and **Gitlab**

— **Agile programming** methodology and **SCRUM.**

— Ability to build prototypes in **Figma**.

— Work with Stacks mixing these 6 core technologies: FrontEnd: **Angular** / **React**, Service Layers: **ASP.NET** / **Node** / **Express** / **GraphQL**: **Apollo Server/Client** and for Databases **SQL Server, MySQL, PostgreSQL** and **Firebase**.

SUMMARY

- Over **25** years of experience in IT industry involving **Software Analysis**, **Design**, **Development**, **Testing**, **Deploying** and **Training**.
- Hands on experience in doing the **Data Modeling** and developing **Intranet**, **extranet** and **web applications**.
- Advanced knowledge creating **SPA's** in React/**Angular** with **Redux**, **RXJS**.
- Experience in **React** development utilizing **Redux**, **Axios** and **GraphQL**.
- Excellent exposure towards **Integrating**, **Maintaining**, **Testing**, and doing **Support** for **Web, Mobile** & **Windows applications**.
- Excellent understanding of **Production support**.
- **10** Years of experience in designing and building applications using **Microsoft.NET** Framework and **Visual Studio**.
- **15** years of experience Designing, Developing and Implementing **Web Services.**
- Experience in building Web Applications and **N-tier** Windows applications using **C#, ASP.NET, EF.**
- **7** years of experience in building Web and Mobile Applications using **Angular, React, Ionic, Node and MySQL / Firebase.**
- **4** Years of experience developing Web Services using NestJS and Node.
- Wide experience using **Object Oriented** Programming Languages (OOP)
- **20** Years of experience Programming in Javascript
- Experience in **Information System Project Planning and Management (SCRUM).**
- Experience in developing and consuming **XML Web Services** using **C#**.
- Experience in developing and consuming **REST Web Services** using **NodeJS** and **Express**
- Experience in writing **stored procedures**, database **triggers** using TSQL.
- Expertise working with **ADO.NET using SQL Server.**
- Experience of **9 years** in Database design using **MS SQL Server.**
- Experience in RDBMS using **SQL Diagrams**.
- Extensive experience in **SQL Server**, **MySQL**, **PostgreSQL and Firebase.**
- Knowledge of **Python**, **AI Technologies** and **Prompt Engineering**.
- Experience in **Microsoft.Net Code debugging** and naming conversion, testing and live server's day-to-day update tasks configuration and tuning.
- Excellent analytical, communication, administrative, interpersonal skills.

KEY SOFT SKILLS

- Strong Organizational Skills.
- A team player.
- Fast learner, keeps updated with the latest technologies.
- Great communication skills.
- Bilingual, Spanish Speaker as well.
- Easy going and always ready to help.
- Empathy.
- Problem Solving.
- Approachability and Helpfulness.
- Great attention to details.
- Open to learn new technologies

CERTIFICATIONS

Microsoft CERTIFIED
Application Developer

TECHNICAL SKILLS

GUI	HTML 5 / CSS3 / SASS
Languages	C# / WPF / WCF, Javascript/Typescript (Angular, React, Ionic)
Back End	Node, Express, GraphQL, C# Web APIs (.NET and .NET Core)
RDBMS	MS SQL Server, MySQL, Firebase, MongoDB
Operating System	Windows Server, Mac OSX, Ubuntu Server/Workstation
IDE & Development	Visual Studio 2019 / Visual Studio Code / JetBrains WebStorm
Web Programming	HTML5 / Typescript / Angular 8 / React / Redux
Frameworks	Ionic 4, Cordova, Electron
Cloud	**AWS**
Exposure to	Python
Design	Figma, Photoshop, Axure RP, Miro
Version Control	Github, Gitlab, Git
Packages	MS Office, Adobe Photoshop, Apple Pages/Keynote, Google Drive
Protocols	HTTP, HTTPS, WebSockets, TCP, FTP, POP3, SMTP
Web Server	IIS, Apache, Node App

PROFESSIONAL EXPERIENCE

10/2022 – 04/2023
Chief – New York, NY
Lead Software Engineer

Chief is the only private membership network focused on connecting and supporting women executive leaders. It offers multiple online services for C-suite women. Chief has been recognized as one of Fast Company's Most Innovative Companies of 2021, and its diverse membership includes 20,000 of the most senior executives in the United States.

Responsibilities:

• Monitoring development activities to ensure projects were carried out according to plan.

• Mentoring 4 developers in React and frontend development patterns.

• Full stack development for our member-facing web experience.

I was a developer lead in the team responsible for creating the Chief Homepage experience as well as the Information Architecture for the entire site, working in a system with a **React** frontend and a **Node** (**NestJS**) Backend deploying to the **AWS** cloud.

Gerente Administrativo

12/2021 – 04/2022
AppOnBox – Los Angeles CA / Merida Mexico.
Software Engineer

AppOnBox creates Buildbox which is the world's first software that allows anyone to create amazing games regardless of technical skill. Due to its unique user interface, making games becomes a fluid process that doesn't require any scripting, programming or software design experience.

Responsibilities:

- Built and modified web service endpoints in NestJS (Node) to provide multiple capabilities to the asset store related to other third party services such as ElasticSearch, HyperWallet, etc.
- Build customer-facing applications for online community 3D object shop as well as internal facing administrative tools to communicate to end users.

I was part of the team responsible for creating the Buildbox Assets Store Web application which provides thousands of interactive 2D and 3D assets to the Buildbox developers community as well as supporting the BuildBox platform Web Service architecture. Environment: Frontend was **React** and backend **NestJS** (**Node**) deploying to the **AWS** cloud infrastructure using **Docker**.

5/2010 – 12/2021
GeoSys Online – San Diego CA / Merida Mexico.
Senior Software Engineer/Technical Lead

GeoSys Online was a small business based in San Diego CA; their customers were mostly entrepreneurs and startups developing new technologies and web/mobile apps. GeoSys developed Corporate Web Sites and Web Applications.

Achievements:

- Crafted Winning Strategies: Formulated effective business and marketing strategies, ensuring a seamless journey for clients from project inception to timely delivery.
- Expert Team Management: Efficiently managed development teams, implementing agile methodologies, and aligning the right software and hardware for optimal productivity.
- Cutting-Edge Tech Solutions: Developed advanced Web and Mobile apps using technologies like C#, React, Ionic 2, Angular 2, NodeJS, Express, Mongo DB, Firebase, and MySQL, ensuring top-notch solutions.
- Consulting Excellence: Provided expert consulting in Microsoft Technologies like C#, ASP.NET MVC Core, SQL Server, and WPF, enhancing client projects with innovative solutions.
- Inspiring Team Leadership: Led and motivated developers when needed, utilizing Agile and SCRUM methodologies to foster collaboration and drive successful outcomes.
- Educational Outreach: Created engaging tutorials in video and written formats, benefiting both consultants and clients. These materials not only empowered our team but also served as a strategic marketing tool, attracting new clients.

12/2005 – 05/2010
Symetri Internet Marketing – Greensboro, North Carolina
Sr. Microsoft .NET Web Developer

Symetri Internet Marketing is a company based in Greensboro North Carolina; their customers are mostly large furniture companies in the east coast. Symetri develops Corporate Web Sites and Web Applications as well as performs Search Engine Optimization (SEO) and Web Analytics.

Achievements:

- Seamless Business Interaction: Collaborated closely with the business side, ensuring the smooth maintenance of existing ASP.NET Web Applications, enhancing client satisfaction.
- Innovative Development: Led the design and development of a cutting-edge SEO Reporting Tool in Adobe Flex 2.0 and Cairngorm, empowering clients with valuable insights.
- Expert Application Development: Crafted robust components, classes, and applications using ActionScript 3.0 / Flex 2.0, showcasing technical expertise and driving project success.
- Efficient Project Management: Utilized UML & Visio for meticulous analysis and design, ensuring precise execution and alignment with project goals.
- User-Centric Interface: Developed intuitive user interfaces using Web forms and ASP.Net, enhancing user experience and client engagement.
- Advanced Technology Integration: Leveraged COM Components for PDF/XLS Conversion and Database Access (Data Layer), demonstrating versatility and problem-solving skills.
- Data Optimization: Created Stored Procedures & Triggers in SQL Server, implementing intricate business rules and ensuring data integrity.
- Strategic Web Services: Developed & Consumed Web Services for data access in Flex / AJAX Applications, fostering seamless data integration and functionality.
- Technological Proficiency: Expertly handled XML, XSL/XSLT, XSD, and WSDL, showcasing a strong command over diverse technologies crucial for project success.
- Version Control & Reporting Excellence: Implemented SourceGear Vault for Version Control, ensuring a streamlined development process, and utilized SQL Server Reporting Services for effective reporting and data visualization, contributing to data-driven decision-making.

3/1999 – 11/2005
LaEnciclopedia.com – Miami, FL
Software Developer Lead

LaEnciclopedia.com is an online Encyclopedia in Spanish that is targeted to all Latin America and Spain, it is comprised of large size databases with information on Dictionaries, Biographies, Geography and other sciences. It features premium web content like videos, audios, graphics, surveys, quiz tests and more.

Responsibilities:

- Strategic Application Design: Spearheaded the end-to-end design of the application, utilizing established ASP Patterns and Architectures, showcasing expertise in web development strategies.
- Leadership & Project Management: Led a team and served as the Project Manager for the LaEnciclopedia.com project, ensuring seamless collaboration and efficient project delivery.
