Summary

As an Enterprise Strategy Consultant with more than 30 years of experience, I help clients from various sectors and domains to envision, plan, and implement transformational solutions that align with their vision and goals. I am a certified enterprise architect, business architect, data architect, information officer, and technology officer, with expertise in TOGAF, DoDAF, data governance, master data management, and event driven architecture.

Currently, I am consulting and advising clients from the top 500, DoD, local businesses, and agencies on their current and future business and technical landscape, facilitating the view of the future of their business through the eyes of the corporate visionaries, and creating the supporting architecture and roadmap for that vision. I call this approach Innovation Architecture, which goes beyond digital or cultural transformation, and examines the range of transformation options and the best mix for each organization. I am passionate about leading the assessment, gap analysis, and the roadmap that is best suited for each client, and enabling them to achieve their desired outcomes.

Experience

Enterprise Strategic Technical Consultant

Self-employed

Sep 2021 - Present (2 years 4 months)

Consulting and Advising Clients (From Top 500, DoD, to local businesses and agencies) on their current business and technical landscape, facilitating the view of the future of their business through the eyes of the corporate visionaries and creating the supporting architecture for that vision and most importantly the roadmap on how to get there.

Using TOGAF and DoDAF as guidance, reviewing logical and physical database models, business process models and process flows, and other artifacts and design documents (including risk compliance, security compliance, database design documents (DIV-1 (conceptual), DIV-2 (logical), DIV-3(physical)), system design documents, interface control documents (SV's and OV's)

Senior Enterprise Data Architect

ECS

Jul 2022 - Nov 2023 (1 year 5 months)

Advising Senior DoD and US Army Leadership on creating a data driven culture to tackle a data rationalization effort where over 50 systems and sub systems with over 30 years of maintenance are to be aligned and combined to support the US Army's Global Force Information Management and Training and Readiness Initiatives. Working with the Department of Army's Management Office data lake initiative and their Transaction Management System and the Palantir's Analytical Tool for application rationalization AND data rationalization. Support the Data Steward in creating a foundational architecture for data governance and master data management.

Enterprise Architect for the National Guard Bureau (as a Contractor)

National Guard Bureau
Oct 2018 - Sep 2021 (3 years)
Oct 2020 to Sep 2021 for the G-1 : ActioNet - www.actionet.com
Enterprise Architect & Team Lead for the Architecture and Modernization Team
- Lead Team of Architects (10 at one point) on data services, database consolidation and data warehouse optimization, network and cloud architecture, business architecture using DoDAF guidelines.
- Reduced database objects by 10% without reduction in functionality
- Documented, Improved 50% of data feeds (updating interface control documents)
- Assisted in process for Authority to Operate
- Established vision for data governance, master data management and establishing an event driven architecture.
- Interfaced with the software development and database teams for (Agile) sprints
- Constant evaluation / monitoring of Azure, AWS and MilCloud

Dec 2019 to Oct 2020 for the G-6 : Autonomic Enterprise -https://www.autonomicenterprise.com/

Enterprise Architect, documenting their current (AS IS) systems and networks, soliciting their future requirements and capabilities. Designing their future (TO BE) systems and networks and creating a Transformation Plan that facilitates their needs. Identifying and assessing current Enterprise Architecture, Cloud environment (Azure, AWS and MilCloud) and Situational Awareness soliciting future vision and identifying and documenting a gap analysis and roadmap.

Also part of the senior level strategy team contributing to senior level whitepapers for their understanding of their current environment and what they can do to move forward in complying with DoD's greater vision and cyber requirements and incorporating the NGB's vision. Reviewing ICD, DBDD and SDD for compliance/standards.

Oct 2018 to Jun 2019 for the J-6 CIO : Tenica, Inc
Documented for the NGB (ARMY and AF systems (both active and reserve components) and contributing to strategies along with the 54 states/regions. For situational awareness, fusion centers, disaster response and for strategy planning (500 day, 5+ year).

Chief Enterprise Architect

Office of Naval Research
Aug 2017 - Jul 2018 (1 year)
Chief Enterprise Architect for Superlative Technologies Advanced Technical Group: www.suprtek.com
o Working on Proposals, advanced EA research, mentoring and growing EA practice at SUPRTEK
o Chief Enterprise Architect for the Office of Naval Research
o Reporting directly to the ONR CIO assessing current technologies and architecture , soliciting a vision of the future and creating a roadmap for the command. Updating their DoDAF artifacts (over 200+)
o Acting as Project Manager for the projects that are assigned
o Network and Cloud Infrastructure upgrade project, evaluating Azure, AWS and MilCloud options vs. on premise cloud at ONR
o Network Metrics project
o Lead for the Security Architecture Working Group (Developing and reviewing FISMA compliance)
o Lead for the Architecture Working Group (5 people) (Developing and reviewing Interface Control Documents, Database Design Documents, Software Development Documents. Including business workflows, conceptual, logical and physical database design documents.

o Future Recommendations and Road Map
o Current Industry Best Practices for Naval “excepted” network for NMCI
o Integrating ONR Legacy Network with NMCI network and working with DON and 10th fleet for ATO approval
o Introducing elements of ITIL and DevSecOps to the operational team for their future vision and a roadmap to achieve.

Enterprise Architect - Information Architect - Data Architect

US Army

Mar 2017 - Jul 2017 (5 months)

Northrop Grumman through Insight Global.

o Enterprise Architect / Data Architect – Us Army’s Planning, Programming, Budgeting and Execution PPBE capability
o Evaluate current status of the data warehouse. Over 20 Oracle Schemas (in one instance), over 3000 tables and 40,000 columns of data. In compliance with DoDAF produced (DIV-1, DIV-2, DIV-3) Conceptual, logical and physical layouts (and other DoDAF artifacts) of their interface database and their data warehouse. Editing the Interface Control, Database Design and Software Development Documents
o Documented Performance Issues of current Operational Data Store (ODS), Extract, Transform and Load (ETL) and of the Data Warehouse itself (OWB)
o Future Recommendations and Road Map
o Current Industry Best Practices for Oracle 12g
o Creating Datamarts to serve the various Communities of Interest
o Changing from a row based technology (Oracle) to a columnar storage (Vertica or Amazon Red Shift)
Served as a Data Visionary responsible for data and database changes for complex application redesign to support unstructured data and redesign the database structure for long term growth, while maintaining performance levels. Assisted in the design, development and reporting with Oracle Business Intelligence Enterprise Edition and Tableau. Created the logical and conceptual models of the database for business changes and technical changes. Troubleshoot and advise on multi-dimensional and relational databases in a data warehouse reporting environment.
Final Recomendation included replacing the role that I had done with a database administrator focused on performance tuning and mentoring developers on using SQL for performance.
o Documenting and Operations of the AWS (redshift database) and MilCloud options

Senior Certified Enterprise Architect

Hewlett Packard Enterprise

Feb 2006 - Feb 2017 (11 years 1 month)

2013-2017 Lead Data Architect for US Public Sector
Proposals, Red Teams, Tiger Teams, White Papers, Cloud Evaluation/support (Azure, AWS, MilCloud and HPCloud). Provide consulting services to HP clients (IC, public sector, commercial) - DoDAF
• 2016: EA Tower Lead – US Postal Service
o Assess 3 systems “As Is” (600K people, 60K users, 20K concurrent).
o Lead workshops soliciting current pain points and future vision, create gap analysis, and a roadmap incorporating DevSecOps, Agile and ITIL into the corporate delivery model.
• 2016: EA update DoDAF - ITES-3H (USAF $5B)
• 2012-15: - Lead Architect, Transition Lead, DB Lead and DoDAF coordinator to support the DoD Synchronized Pre-deployment and Operational Tracker (SPOT) Project, Agile Instructor for the team (100 people)

• 2013: Tiger Team – produce 2 reports for the South Carolina Governor's Office, DB and Data gap analyses (reports, findings, and recommendations) and current "As Is" state of the db architecture and ETL process for the State Local and Education (SLED) Child Support Enforcement System Project
• 2012: Systems Architect for the Enterprise Business Systems (EBS) for an IC sponsor; performed systems architect duties, provid SETA level guidance for data quality via transformation methods, and business rules impacting the data requirements
• 2011-12: Lead Data Architect - DLA - Fusion Center DW
o BPM, DoDAF, DB data dictionary and design documents; DIV-1, DIV 2 DIV-3
o Analyze "As is" statef of db warehouses; and the undocumented ETL updating the interface control documents
o Document data transformation and logistical metric calculations from disparate dbs
o Provide a conceptual vision for DLA leadership and senior management of "As Is – 1 FTE to produce a monthly report to "Future State" – a dashboard command control center
• 2008-10: Lead EA – Fusion Command Center/Crisis Management. Using DoDAF to supplement Interface Control, Database Design Documents.
• 2006-09: EDS (see EDS experience)

Senior Information Engineer

Electronic Data Systems

Feb 2006 - Aug 2009 (3 years 7 months)
o Awarded Regional Corporate Award
• 2006 - 2009 Technical Consultant – Provided technical solutions for an Annapolis Junction, MD program, worked on proposals, reviewed Statements of Work (SOW), analyzed labor categories, collaborated with teaming partners, and interviewed candidates to staff positions. Reviewed Interface Control, Database Design (Conceptual, Logical and Physical) and Software Development Documents. Incorporating Agile, DevSecOps and ITIL into corporate proposals and instructing solution architects and other key personnel on their inclusion to the workflow of operations.
• 2006 - 2008 Database Consulting Engineer - Reviewed and analyzed the Etravel project's enterprise data structure and oracle standards format resulted in;
o Added value to the database representation – integrated physical data models, integrated database dictionary with the GUI help definition, and ETL data interface
o Restructured procedures to correctly perform backups and recovery
o Increased query efficiency by 80%
• 2006 - 2007 Enterprise Architect – Created all 5 Framework Process Decompositions; Collaborated with team members (over 50 people) to create Sequence Flows and Use Case Diagrams for 5 frameworks; Finance and Administration, Enterprise Horizontal, Data Management, Involved Party, and Health Care Payer Frameworks and was hand-selected to provide Peer Process Review for an additional 6 frameworks

Senior Database Engineer

SAIC

Mar 2003 - Feb 2006 (3 years)
• 2004 - 2006 Information Engineer – Maintained, designed and integrated information from the Oracle and Terratext database layers to the application layer.
o 24x7 mission support for critical DoD/IC missions.
o Implemented innovative approach to support critical mission patch.

o Developed the Ontological Mapping of the Middleware services, XML and XSD of all the (over 2000) Middleware Metadata components. Validated over 1200 XML documents using Stylus Studio and XSL and various software validation methodologies.
• 2005 Information Engineer and Database Architect - Provided the logical and physical data models and data dictionaries and reviewed the online documentation and testing of the application.
o Resulted in successful implementation and customer acceptance of the project
• 2004 -2005 Lead Database Architect for Ingest to Rest for Largest Data Collection Project (50M records/hour) - Led the Database team (5 DBAs) Managed the Ingest to Rest portion of the dataflow and mapping to the CCDM (Common Cryptological Data Model) to the Massive Analytical Database Platform. Supported the first phase entity extraction. Used Oracle Designer, ER/win and IBM's Rational Rose.
• 2003 – 2006 Database Architect for SAIC Annapolis home office included setting up the Annapolis office research lab, and managing the Oracle Partner Network and the Oracle Metalink Account for all of SAIC

Senior Oracle Practice Lead

Oracle

Nov 2001 - Mar 2003 (1 year 5 months)
• 2003 Theatre Medical Information Program (TMIP) –Teamed with Northrop Grumman. Developed proof of concept, enterprise data modeling (conceptual, logical and physical models), enterprise architecture, metadata markup, XML and ETL transformation, and validation.
• 2002 Randolph AFB HROC - (RESUMIX, IVRS, DATAMART, CDM) – Developed Process Hierarchy for "As Is" system. Oracle Enterprise Database and Application Migration from 7.3.4 to Oracle 8i.
• 2001-02: National Guard Bureau (NGB) – SABERS – Converted forms from 4.5 to 6i, led Oracle Forms migration (5 developers), and assisted in conducting unit testing, acceptance testing, migration, and the mitigation of deployment issues. Evaluated the NGB enterprise and assisted in SIDPERS deployments and mitigated maintenance issues.
• 2001 Commander Atlantic Fleet Budget Formulation: Conducted the gathering of Requirements for the CINCLANTFLT Financial Management Process. Created Functional Requirements (Process Models, Function Hierarchy), Entity Relationship Diagrams and prototyping screens.

President, Chief Operating Officer, Director Consulting Practice

Business Intelligence Development Corporation (BiDC)

May 1999 - Nov 2001 (2 years 7 months)
• 1999 - 2001 Managed partnerships, alliances, contracts and negotiations, proposals
• 1999 - 2001 Taught the Oracle DBA and Dev certification track at various client sites.
o University of Maryland – Oracle Dev and DBA Certification Track
o Montgomery Community College - Computer Concepts and Unix
o Advanced Concepts Training - Edited, Wrote Intro to Oracle
CapOne - Unix and Intro to Oracle, PL/SQL and Advanced PL/SQL Programming
Ameritrade - Unix and Intro to Oracle, PL/SQL Programming
International Paper - Unix
RISE - Unix, Intro to Oracle, PL/SQL and Advanced PL/SQL Programming
o Training/etc. - National Guard - Oracle DBA Certification
Bank of America - Oracle DBA Certification
o Keane Consulting - Oracle Dev Certification
o Computer Institute - Oracle Dev Certification and the Oracle DBA Certification

• 2001 Senior DB Specialist for the DoT for 2 projects: LADS project; created the forms, reports, web server and resolved TARS - Trouble Tickets. FMIS: wrote reports, modified forms, created views and modified ASP code
• 1999 - 2000 Program Manager and Lead Senior Analyst at (AAUSN) of U.S. Navy Budget Office reporting directly to the Undersecretary of the U.S. Navy.
o Program Manager ($2M)
o Lead Enterprise Architecture task orders:
Provide Database Engineering (Design, Modelling (Conceptual, Logical, Physical and Data Dictionary), Dataflow Diagrams, ETL Processes
Provide Business Process Engineering Process Flow Diagrams,
o Lead the user interface development and application layer teams and the application layer (10 staff each),
o Senior Analyst supporting the Phase 2 and 3 AAUSN program. In this role managed a team of programmers to integrate programming techniques (forms, reports, oracle WebDB (oracle portal)) and took the lead in developing the complex technical issues such as the business flow process and data flows, data structure diagram. During Phase 3 led programmers to implement and integrate final product (SARMIS) with SPD.

Senior Oracle Practice Lead

Advanced Technology Systems Company

Apr 1997 - May 1999 (2 years 2 months)

• 1999: Client: Integrated Health Services, Hunt Valley, MD. - Data Warehouse Consultant - Integrated data from over 600 facilities into one corporate database. Application interfaces included Oracle Discoverer (to analysts), Web pages and MSFT active server pages to end users.
• 1998-1999 Client: World Bank, Wash, D.C. - Lead Technical Consultant – provided support in the rapid design of the EDI educational interface. Project was written in Cold Fusion (front end) with an Oracle Database integrated with an expense system and a MS Access Time Recording System. Provided Designer 2000 support of design and general Oracle consulting with individual requirements. Provided UNIX script support and PL/SQL support for the interface requirements.
• 1998 Client: J.M. Smuckers Corporation, Orrville, OH - Senior Technical Consultant - Provided support in the integration of Oracle's CPG application with Smuckers IT department needs. Provided Designer 2000 input and general Oracle consulting with individual requirements. Provided key analysis to Mannugistics to spec out several reports (ahead of schedule) that were critical to user acceptance. Reversed Engineered the CPG application. Creating a meta-data model for the purposes of tracking version control of application and of conversion/interface programs. Taught courses in Oracle Reports 2.5 and Discoverer/2000 (Query builder 2.5).
• 1997 - 1998 Client: Maryland Automobile Insurance Fund, Annapolis, MD o Lead Senior Consultant and Program Manager for a full life cycle implementation of the Uninsured Claims Jurisdiction Project. Conducted knowledge transfer and training to a team of client programmers who were familiar with COBOL and mainframe processing. The knowledge transfer included Oracle database methodologies, PL/SQL, full life-cycle methodologies.

Consulting Manager - Oracle Practice Lead

Noblestar

May 1994 - May 1997 (3 years 1 month)

• 1996 - 1997 DoT - Lead analyst/prog for design/dev team (5+ people). Application migration Forms 4.0 to 4.5 and reengineer/redesign the db to the model needed by DOTIG. 60+ Tables and 40+ Forms

involved in TIGR system. Support the implementation of demos for deployment nation-wide, across 22 agencies including the Executive and Presidential Council for Integrity and Efficiency.
• 1995 - 1996 FDA - Lead analyst for db transition and analyst for design team (over 30 people). Convert data from ISIS application (HOST based) to redesigned OASIS (Client/Server) application. Provide analysis during the design phase. Design of an active and reporting instances (which would hold all history data, divided by years). Transition 100+ tables and convert the data. Include creating cross translation tables, mapping document, transition error tables, and forms to access error and mapping tables.
• 1995 - 1997 Office of Naval Research (DSTI) - Lead analyst for a data transition team responsible for downloading data from several apps (on an IBM Mainframe) to a Client/Server db for use with a Client/Server app. Create temp mainframe look alike tables, developer and end user temp maintenance and cross table forms, mapping document tables and Transition Error tables and functional testing (IVV) support. Transition 250+ tables. Develop cross-mapping tables and forms for the transition of non-relational data into the relational application (INRIS)
• 1994 MITRE Corporation
o Catalog and analyze the Report Distribution process for MITRE custom reports and the standard reports for Project Accounting, Revenue Accounting, Receivable, Payable, Purchasing and General Ledger. Distribution process involves electronic notification, mailing, LAN residual, manual (hard and soft) distribution of reports done automatically and on-demand.
o Wrote a cross-matrix report on the MTS Utilization by Center for Project Accounting, Contract Financial Highlight's and Project Financial Highlights reports.

Lead Technical Consultant

Oracle Resource Enterprise System Technologies

Jan 1991 - Jan 1994 (3 years 1 month)
1994 Legent Corp, Pittsburgh PA.
o Professional Services Organization - Educational Tracking System and Professional Agreements Tracking System.
o Financial Applications Group - Oracle Financial (AP and AR)
1993 Bank of Ukraine, Ukrainian Parliament, Kyyiv, Ukraine
o Analyze user requirements and specifications for various organizations. Communicate with program managers and programmers and define end user, training requirements, hardware specifications, implementation needs, maintenance and future enhancement possibilities. Conduct training in full life cycle development.
1993 Senior Systems Analyst for Comsys to Oracle Corp Client: Jacksonville Naval Air Station DCPS, Jacksonville, FL
o 15 member team to develop 5 major subsystems for the computer data collection system. Systems included Defense Civilian Payroll, Document Entry, Project Accounting, General Ledger and Labor.
1992-1993 Senior Systems Analyst for Computer Experts to Astech Corp. Client: Royal Saudi Air Defense Force: Arlington, VA. (9 member team 4 major systems)
1992 Senior Systems Analyst for Noblestar to Oracle Corp Client: Defense Commissary Agency, Ft. Lee, VA.
o 3 member team to develop/maintain batch processes that run every night (handling over $300 million), and a daily data input/maintenance system that runs interactively during the day.
1991-1992 Senior Systems Analyst for Noblestar to Oracle Corp Client: Charleston Naval Shipyard, Charleston, South Carolina
o 2 man team to develop/field an Oracle db real-time accounting of manhours, material and workload for the entire machine shop. Machinists would ‘wand in’ when they started a particular piece of work,

and the shop foreman could then manage several projects based on either job order or by shop work instruction number.
1991 Systems Analyst for Vista Consulting Client: Halliburton NUS Environmental Corporation.
o 5 member team convert, reverse engineering and customize Radiological Database and Management System (RDMS) - (600+ forms).

Programmer/Analyst

Unisys

Jun 1987 - Jan 1991 (3 years 8 months)

• 1991 WISDIM Joint Chiefs of Staff (World Information Standard Data-Dictionary)
o Convert application (forms, BAT and COM files) from a VAX, PC to a Honey Mac (AUIX).
• 1990-1991 USAREUR MWR U.S. Army Europe Morale Welfare and Recreation Budget
o Programmer/Analyst Develop the Annual Operating Budget, menus, the Report Parameter Screens. Data Flow Diagrams, Entity Relationships and DB design.
• 1989-1990 PBS/IS: GSA Public Building Service/Information Systems.
o Maintained/Developed Programs that extracted data from the national database performed Quality Assurance on products for national implementation. Develop lesson plans for national training at various GSA sites and Implement training.
o Standard Level Users Charge (SLUC)
o Miscellaneous and Rebill System (MARS)
o Budget Estimate (BUDEST)
o Security and Law Enforcement Management (SALEM)
o Energy Usage Allocation System (EUAS)
• 1989 IFSM: U.S. Army Information Facility Services Management.
o Develop teaching materials (lesson plans, guidelines, scripts, queries) for Customer Service and Job Cost Accounting packages.
• 1988 PBS/IS: GSA Public Building Service/Information Systems.
o Convert software from Univac 1100 machine to Unisys A Series machine. Develop/Teach course in DML deliver to 11 GSA regions nationwide.
• 1988 RNTDS: U.S. Navy Restructured Naval Tactical Data System.
o Track Engineering Change Requests and Software Trouble Reports. Check code to make sure that corrections were made and executed properly. Accountable for the Validation and the quality of the deployment tape to the U.S. Navy for the Shipboard TDS.
• 1987-1988 STRIDE: General Services Administration (GSA)
o Program and analyze programs/reports from other departments to insure Contract and Company standards. Write validation programs and conduct research into more efficient systems and data retrieval. Our QA team was responsible and accountable for all documentation and deliverables of the project.

Education

California State University - East Bay

Master of Architecture - completed EA Blackbelt - , Enterprise Architect

2016 - 2026

Many organizations invest significant dollars in attempting to apply the discipline of Enterprise Architecture without the benefit of fully qualified staff to do the analysis and the EA modeling and program support activities to make it work. This increases the risk and likelihood of failure, for them and/or their clients. FEAC™ Certification of your staff ensures the keys to complex projects' success

residing in understanding and leveraging the culture of the organization, tying into the budgeting processes, developing a realistic Statement of Work (SOW), selling it internally, implementing and integrating program elements, and measuring progress. For the Government, it also involves linking Enterprise Architecture to the CPIC, Exhibits 300 & 53, security, and to other ongoing OMB directed initiatives.

FEAC Institute
Certified Black Belt DoDAF Enterprise Architect (FEAF, TOGAF), Transformation Technology
2015 - 2016

PennWest Edinboro
Bachelor of Science, Computer Science - Minor in Mathematics
1983 - 1986
Bachelor of Science in Computer Science - Systems Analyst
Minor - Mathematics

Temple University
Bachelor of Science - BS (not graduated), Computer Science
1982 - 1983
Computer Science

Gannon University
Bachelor of Science - BS (not graduated), Undecided
1981 - 1982
General Studies (Business Law and Computer Science)

Penn State University
Bachelor of Science - BS (not Graduated), Chemical Engineering
1980 - 1981
Chemical Engineering

Mcdowell High School
High School, High School
1976 - 1980

Licenses & Certifications

Enterprise Architect CEA - The FEAC Institute
Issued Mar 2015 - Expires Apr 2018
435284

CEAF Black Belt Certified (DoDAF) - The FEAC Institute
Issued Mar 2015 - Expires Jun 2021

435284

Tactical Handgun 101 - www.cumberlandtactics.com

Tactical Carbine - www.cumberlandtactics.com

Zachman Certified - Zachman International

John C. Maxwell Leadership Certificate (Underway)

Implementing 2017 FISMA & Cyber Security Changes - Digital Government Institute

Skills

Leadership • Active Listening • Presentations • Post-Sales • Database Design • Data Analysis • Oracle • Business Process Design • Requirements Analysis • Enterprise Architecture

Honors & Awards

Multiple Awards at EDS / HP / HPE - EDS / HP / HPE

• 2016 – HPE Certificate for the HPE Global Methodolgy - Information and Strategy for Architecture
• 2016 – HPE Award to attend the Gartner Enterprise Architecture Summit in Washington, D.C.
• 2016 – HPE Recognition Award for Architecture presenting at Architecture University
• 2015 – HP Recognition Award for leading USPS technical call on Enterprise Architecture
• 2015 – HP Recognition Award for work on Emergency Data and Bug Fix
• 2014 – Intro to Enterprise Architecture and the Zachman Framework
• 2014 – HP Certificate for HP Global Methodology for Analytics and Data Management
• 2012 – HP Recognition Award for work done on DLA Fusion

Lifetime Membership Award - www.hmgs.org

Jun 2008

In recognition of successfully transitioning the convention operations

Pour Encourager les Autres (PELA) - in order to encourage others - Historical Miniatures Gaming Society - www.hmgs.org

Nov 2009

The HMGS Academy of Historical Gaming Awards Committee is excited to see our current Game Master (GM) Awards Program go into its second decade of recognizing our best GMs for demonstrating their “A Game!” at our conventions. We encourage all GM’s and HMGS members to help support the HMGS GM Awards program.

Pour Encourager Les Autres (PELA):

The “PELA” is a GM Award primarily for traditional historical based miniatures gaming event, and selected during morning, afternoon and evening sessions daily. The “Pour Encourager Les Autres” quote stems from an Admiral from the Age of Sail. The Admiral, who, after a defeat was executed “To encourage the others".
