Accomplishments

Privacera Provided business and design solutions that gained 2 of 30 accounts.

Bank of the West and **Classic Systems** (Design Consultancy Firm) hired me at least 3 times to work with same team.

CISCO's COSMOS**X** won 'Software Engineering Excellence' at 2018 Develop@CISCO. Pageviews increased from ~2,000 to over ~113,000 over the period of few months due to data visualization and pipeline views.

US Bank WAP Mobile App Refresh design completed in 3 months (2 weeks ahead of schedule) saving thousands in OPEX costs.

NetApp QuoteEdge design reduced the quote to invoice clicks by 20-50 % and eConfigurator adoption rate for partners increased from 15 to 91 %.

Professional Experience

Senior UX Lead| Mar 2022 to Jan 2024 — Privacera | Fremont, CA

Privacera provides data security governance and GenAI solutions to fortune 500 companies.

- Provided design strategies and business proposals for the Data Governance CLOUD/Platform and GenAI apps.
- Led the team of designers, interviewed customers, worked with cross-functional teams, and mentored junior designers.
- Setup design process, reviewed/approved designs, and managed the entire design efforts to align with the business goals.

Lead Designer | Apr 2015 to Jul 2023 — CISCO Systems | San Jose, CA

Two major projects: EPNM and COSMOS**X**. I designed EPNM that manages Service Provider network. I designed COSMOS**X** from its inception and is an award-winning application in 'Software Engineering Excellence' at 2018 Develop@CISCO Global conference.

- Designed COSMOS**X** and system library using design thinking from empathy to test by working with cross-functional teams.
- For EPNM, interviewed/visited customers, designed business features, and gave requirements for Prime widget library.
- Gave design directions and reviewed the designs for several designers working on their respective apps.

Founder and UX Designer | Jul 2014 - Apr 2015 — Neutronze | San Jose, CA

I secured the design contracts for the following clients.

UX Designer/User Researcher | eBay, San Jose, CA

I worked on Nous (Data Analytics), Touchstone (Experimentation), Data Governance, etc. using User Centered Design.

- Conducted user research, analyzed/consolidated the findings, and created personas, mocks, widget library, and visual design.
- Partnered with product to refine business/design requirements and fellow designers to build a central UX team and strategy.

Mobile UX Designer | Bank of the West, San Francisco, CA

I created iPhone app prototype for usability test.

Mobile UX Designer | World Ventures through Classic Systems, Plano, TX

I designed Android mobile and tablet app called DreamTrips, a social media travel app to connect with travelers, book travel, etc.

Mobile UX Designer | Wells Fargo through FJORD, San Francisco, CA

I created prototype for Wells Fargo Rewards Program for iPhone and web application.

Mobile Information Architect | US Bank, San Francisco, CA

I worked on the Mobile UX Refresh that involved re-designing iPhone/iPad/WAP platforms. Also, created Apple watch concept.

- Collected requirements from Business Analysts/Product Managers.
- Created user flows and worked with fellow designers as there were several intersecting flows.

User Researcher | NetApp through Classic Systems, Sunnyvale, CA

NetApp brought me back to perform a Time-On-Task study on the Oracle CRM application I designed back in 2012.

- Performed un-structured/structured time-on-task tests with Service Sales Representatives and Oracle team.
- Wrote test plan/script and moderated user sessions to get qualitative and quantitative feedback.
- Analyzed time-on-task test results (using Morae Manager) and presented raw data and performance report.

UX Designer/Business Analyst | Nov 2013 - Jun 2014 — Bank of the West | San Francisco, CA

I designed several online banking modules. I proposed a business solution to reduce the processing time at the branches/ATMs, prototyped the tablet concept, and presented it the ideas to senior management.

- Designed concepts while working with the 3rd party vendor keeping in mind Out-of-the-box app limitations.

UX Lead/Business Analyst | Mar 2013 - Oct 2013 — eFactor | San Francisco, CA

The project introduced eScore tool that acts as a platform for entrepreneurs to meet business advisors, socialize with other entrepreneurs, and ultimately get funding. Another project was to redesign the eCommerce site on web and mobile platforms.

- Created concepts, redesigned efactor.com, and defined visual style.

Sr. UX Designer/User Researcher/BA | Aug 2012 - Jan 2013 — Arbonne International through Classic Systems | Irvine, CA

The project involved designing WebStats for internal and external consultants due to changes in compensation plan.

- Conceptualized the user requirements, designed wireframes/models/user flows for KPIs, Success Line, Payouts, Orders, etc.

Sr. UX Designer/User Researcher/BA | Jan 2012 - Jan 2013 NetApp through Classic Systems | Sunnyvale, CA

The project was about designing an Oracle CRM application that was integrated within SFDC framework for external and internal users. I worked on Pricing & Discounting, Demo Eval, Service Renewal, Quotes Status, Product Validation Request (PVR), etc. projects.

- Mentored junior designers, prioritized/reviewed their work, and managed their schedules.
- Led ideation/design/usability sessions, collected requirements from users and partners, and designed interaction patterns.

Business Analyst | Aug 2011 - Nov 2011 Polycom | Pleasanton, CA

I worked on WW IT Team on a Sales Transformation Program CDH Integration & BI reporting project for Sales Representatives.

Business Analyst | May 2010 - Jul 2011 Wells Fargo | San Francisco, CA

I worked on Internet Portfolio Management online banking project to bring all the business requirements to the current standards.

Founder and Web Designer | Mar 2001 - Apr 2010 Hritika Digital Creations | India

Hub of Quality and Creativity in Digital Design - I designed websites for Rotary Club, Lions Clubs, Study Abroad Programs, etc.

Expertise

UX Lead — **Manage design projects and lead design team**
- Design Strategy - by aligning the design with the business goal and design standards
- Design Thinking - by setting up the process to convert the business requirements into design
- Design System - by creating interaction patterns and visual standards
- Manage Team - by mentoring and bringing discipline to the team and streamlining the team activities

Interaction Designer — **Design interfaces, layouts, and interactions**
- User Stories - by writing narratives on index card
- Process Flow Charts - by defining process/task flows
- Mockups/Wireframes/Prototypes - by drawing low and high-fidelity designs
- Story Boarding - by drawing rough sketches to demonstrate the sequential events
- Functional Requirements - by reading the business requirements
- Documentation - by specifying interactions, annotations, and specifications

User Researcher — **Understand users and their interaction and evaluate the usability of the application**
- Focus Groups - using casual interviews with potential or existing users
- Contextual Inquiry - by observing users performing their tasks
- Questionnaires - by asking open and close ended questions
- Personas - by recording user goals, key tasks, comments, frustrations, etc.
- Individual Interviews - by conducting standardized, semi-structured, and unstructured interviews
- Think-aloud User Testing - by asking the user to verbalize their thinking
- Heuristic Evaluation - by studying the existing artifacts in detail
- Cognitive Walkthrough - by running the users through specific tasks
- Formal Onsite/Remote Testing - by conducting testing of prototype using Morae
- Informal Testing - by conducting usability walkthrough of mockup

Information Architect — **Organize the data in a logical structure for easy accessibility**
- Hierarchal - by creating a parent-child relationship
- Card Sorting - by using open or closed sorting methods
- Site Maps - by understanding and prioritizing the content of the site

Visual Designer — **Create appealing look and feel of the application**
- Unity - by picking elements that unifies with the corporate brand
- Gestalt - to take a holistic look at design
- Space - by separating the components for better readability
- Hierarchy - by using different font color/sizes and indentation
- Contrast - by emphasizing on components to make a difference
- Dominance - by focusing on the important components

Axure Prototyper — **Create a prototype that looks like a real application**
- Interactions - by adding mouse, touch, and keyboard events
- Logic – by adding If-Then-Else cases and And/Or conditions
- Content - by displaying dynamic content based on the selection
- Widgets - by adding interactive design components
- Repeater - by creating data driven tables
