Kamran Baig

610 River Rock Way, Allen, TX 75002 kamranb78@yahoo.com
773-883-0555 https://www.linkedin.com/in/kamran-baig-1667a4138/

PROFESSIONAL SUMMARY

Accomplished IT professional with 19 years of experience, specializing in systems analysis, database design, ETL / ELT development, and business events processing support.

- Approach all projects with a positive attitude, adapt quickly to new technologies, and consistently deliver high quality results on time.
- Meticulous in troubleshooting issues and developing alternative solutions following guidelines.
- Mentor junior developers on proven methodologies for developing data warehousing solutions.
- Self-motivated team player with multitasking abilities, integrating work of other individuals to accomplish defined and prioritized tasks.

TECHNICAL SKILLS

Languages:	SQL, PL/SQL, Shell Scripting (bash, ksh, sh, zsh), Perl, Python, PySpark, HTML, XML
Databases:	Snowflake, Oracle 12c/11g/10g/9i, Teradata 17.x/16.x/15.x/14.x, SQL Server 2016/2012/2008, DB2, Netezza, Salesforce
ETL Tools:	DataStage 11.x/9.x/8.x, Informatica 10.x PowerCenter and IDQ, Ab Initio 4.x, Talend 6.x
Operating Systems:	Windows, LINUX (RHEL, CentOS), UNIX (AIX, HP-UX, Solaris), Mainframe
Applications:	TOAD, SSMS, DBeaver, Endeca, MS Office, Visio, Lucidchart, SharePoint, Lotus Notes, NotePad++, UltraEdit, Sublime, FileZilla, WinSCP, PuTTY, JIRA, VersionOne, Confluence, Remedy, HP ALM, RT, ServiceNow, GIT, SVN, VSTS, PVCS, CVS
Oracle:	SQL*Loader, SQL*Plus, SQL Developer, Exadata, RAC, OEM, AWR, Expdp / Impdp
Teradata:	BTEQ, TPT, FastLoad, MultiLoad, FastExport, SQL Assistant, Studio, Administrator, ViewPoint, Unity Data Mover
Operational Tools:	Apache Airflow, Air9, Automic UC4, IBM Tivoli/Maestro/IWS, Autosys, Control-M, Crontab, InfoSphere Operations Console, IICS, Informatica EDC, Jenkins, Dynatrace
Cloud Technologies:	Amazon AWS, S3, EC2, Lambda, Jupyter, Docker, OCP, Terraform, Ansible Tower

PROFESSIONAL EXPERIENCE

Discover Financial Services (DFS), Remote **12/2020 – Present**
Lead Data Engineer / ETL Developer **2 years 2 months**

- Implemented domain jobs adhering to Cloud Data Fabric (CDF) 2.0 standards, leveraging Snowflake Tasks for historical data backfill into transient tables and subsequent cloning/flipping to master tables.
- Optimized Ab Initio ETL processes and enhanced performance of Snowflake loads on AWS.
- Utilized Informatica PowerCenter 9.6.1 to extract, transform, and load data from various sources such as Oracle and flat files into the Netezza Data Warehouse.
- Leveraged Informatica Cloud (IICS) transformations, such as Address Validator, Exception, and Parser, for data processing, and utilized debugging, troubleshooting techniques using the Debugger and Workflow Monitor.
- Used Big Query and Big Table on GCP as data lake for end point data storage as well as Dataproc methodology.
- Used Snowflake data modeling terminology in Datalakes.
- Used Dataproc in-built wrapper framework for Google Cloud to implement Spark processes.
- Used Tonomi and Jenkins deployment tools for builts and deployments into GCP.
- Created migration flows from AWS Redshift to Databricks environment, settuping necessary configurations, along with scheduler and monitoring system for migration, including data governance, data-cleansing and data cataloging necessities on segregated data in structures and divisions.
- Installed CP4D on the Openshift cluster including infrastructure prepareion from ground up, along with DB2, DMC and other related components
- Architected the TransUnion Data Lake Private Data Enrichment project for seamless movement of files through S3 buckets, supporting marketing campaigns for financial customers using credit bureau data.
- Established code reviews of Snowflake deployment/automation, Ab Initio graphs, Unix scripts, and Meta Data Hub (MDH) DML updates to proactively prevent emergency problem tickets in the future.

Lead Business Data Analyst **10 months**

- Accelerated UAT completion of CIMS for Bank project by efficiently loading ongoing data despite constantly evolving requirements.
- Facilitated weekly support meeting of CIMS for Cards on-call rotation resources to understand existing issues and alert them on upcoming releases.
- Leveraged Informatica Cloud (IICS) transformations, such as Address Validator, Exception, and Parser, for data processing, and utilized debugging, troubleshooting techniques using the Debugger and Workflow Monitor.
- Supported the release of Airflow components, gaining expertise in new tools and sharing insights with team to transition support of Snowflake data availability critical for bank deposit accounts/customers.

Cognizant Technology Solutions (CTS), Allen, TX **06/2019 – 11/2020**
EDW Technical Lead / ETL Developer Consultant – Frontier Communications **1 year 6 months**

- Spearheaded a delivery team of onsite and offshore developers, conducting detailed analysis of project requirements gathered from key stakeholders to estimate effort and offer valuable feedback on design.
- Acquired customer accolades for optimizing leadership critical reports by reducing the runtimes of complex Oracle and Teradata queries by 40-50%.
- Conducted due diligence in implementing efficient ETL methods and migrating Informatica IDQ workflows to PowerCenter for 50-60% improvement in JSON file processing.
- Integrated and leveraged IICS (Informatica Intelligent Cloud Services) for efficient data integration and reporting, optimizing performance through job performance enhancements and designing efficient queries.
- Strong MySQL and MongoDB administration in Commercial Lend with skills in Unix, Linux and Windows. O Experience in upgrading different databases and also migration of data among multiple databases.
- Used AWS Cloud platform with features EC2, VPC, EMR.
- Served in data warehousing solutions while working with a variety of database technologies with proven history of building large-scale data processing systems.
- Used Dataproc and Bigtable in GCP environment as ETL pipeline scheduler and end storage area within a strong data modeling manner such as Snowflake.
- Experienced architecting highly scalable, distributed systems using different open source tools as well as designing and optimizing large, multi-terabyte data warehouses working within security tools such as Apache Sentry and Kerberos.
- Built subject matter expertise in areas including ECO Churn Device data and PEGA transactional data extracted to EDW through BIX (Business Intelligence Exchange) for Customer Interactions Reporting.
- Engineered solution designs, guided offshore teams in Source-to-Target Mapping and Technical Design Document artifacts preparation to secure architecture review board approval for client projects.
- Administered data warehouse projects team, ensuring code adherence to Frontier defined standards and Cognizant best practices before transitioning ETL processes to the Production support team.
- Developed and fine-tuned Informatica mappings using BDM/DEI, PowerCenter, and IICS to integrate business rules and modifications effectively.
- Screened candidates to hire and train resources to align with Cognizant's delivery model emphasizing quality and shortened delivery timelines.

Mr. Cooper, Irving, TX **08/2018 – 05/2019**
Principal Data Services **6 months**

- Supported forward and reverse loan servicing teams in letters generation such as yearly 1098s and 1099s delivering e-statements, warranting the "Champions for our customers" award.
- Coordinated with offshore team to migrate existing ETL jobs from DataStage 9 using Netezza to DataStage 11 using SQL Server database and guided the creation of new jobs in Talend.

Senior ETL Developer / Contractor – Genesis10 **4 months**

- Tracked CHIP loan referral and Dialer Streamline processes, addressing Production failures to prevent issue recurrence aligning with Mr. Cooper core values to earn "Challengers of convention" award.
- Drove efficiencies in conversion activities during Champion Tempo migration to LPS Desktop project.

Tata Consultancy Services (TCS), Dallas, TX **10/2017 – 07/2018**
Technical Lead / Consultant – New York Life Insurance Company **10 months**

- Led a DataStage ETL enhancements team in the ASM group, managing offshore and onsite resources, overseeing technical resolution, and ensuring compliance with client processes.
- Monitored progress against plan while managing scope, schedule, effort and quality throughout requirement analysis, design and development of overall solution being delivered.
- Ensured quality control through artifact reviews, code inspections and end-to-end testing of ETL jobs to establish compliance to all client enforced processes for production releases.
- Interacted with customers/users to address operational aspects of project delivery, identify technical risks, and plan contingencies.

Cars.com, Chicago, IL **11/2013 – 09/2017**
Senior Data Developer **1 year 8 months**

- Trained data developers in configuring Endeca dimensions and properties for adding consumer requested filters on search results page that improve usability of the guided navigation.
- Revamped the underlying data to optimize Business Objects queries and improve report availability of lead generation and inferred vehicle sales to save $1.2 million in potential dealer cancellations.
- Coached Tableau developers to reduce the monthly KPI report runtimes from 13 to 3 hours.
- Pioneered CI/CD pipeline for Oracle database changes to automate deployment of SQL scripts pushed to GIT by using in-house tools and Jenkins for building Docker images from base container.
- Launched a continuous improvement effort of analyzing production workflow bottlenecks to compress the nightly ETL jobs in a much shorter timeframe.
- Assisted in resolving all environment, database, and application issues across OLTP, MDM, EDW, and Hadoop/Big Data processes.
- Collaborated on revising problem resolution and escalation to achieve operational excellence.
- Successfully resolved critical issues faced in DataStage upgrade from 8.7 to 11.5.

Data Developer **2 years 3 months**

- Enabled near real-time disaster recovery for the data warehouse through Teradata data mover utility triggered automatically as part of ETL jobs.
- Attained the Tech Star Award twice for successful Teradata upgrades and migration to 2750 appliance, as well as database software upgrades to versions 14.10 and 15.10.
- Received the "Most Awesome Person" Award for demonstrating my proof of concept to data community of practice for deploying Teradata releases without the need for a DBA and documenting templates for Oracle DDL, DML, DCL statements
- Recognized with the November 2014 "Development Employee of the Month" Award for performance improvements in delta listing service and dealer metrics service queries, leading to increased revenue.
- Adapted to the Scrum framework and Agile methodology for effective product delivery within aggressive Inventory portfolio teams.
- Improved Endeca extract performance by up to 200% using Oracle analytic functions and creating foreign key indexes to meet SLAs (service level agreements).

Allant Group, Naperville, IL **07/2011 – 10/2013**
Technical Architect **4 months**

- Mentored junior team members to proactively perform code reviews and documentation.

Senior Programmer Analyst **1 year 5 months**

- Responded quickly and effectively to changing project priorities, while maintaining quality standards in executing complex data fixes, and applied attention to detail in deploying code changes.
- Routinely addressed production issues using IT best practices within the custom Prevalence ETL tool and optimized long-running scripts.

Database Developer / Contractor – Indecon Solutions **7 months**

- Managed ambiguous project requirements by creating a client value proposition for an analytics-driven marketing campaign.

Acxiom Corporation, Downers Grove, IL **12/2006 – 06/2011**
Solutions Developer **4 years 7 months**

- Assumed responsibility of a track leader within a large-scale project to architect Real Time database synchronization from Data Warehouse and Data Mart to fulfill business process reengineering needs.
- Earned Client Gold Award for exceeding client expectations in successful encryption of 321 million digital images before a stringent deadline surpassing all challenges in maximizing process throughput.
- Played an instrumental role in tremendous revenue growth of account team, contributing to Acxiom's win of the address correction service from its competitors resulting in my individual recognition bonus.
- Overhauled the outbound process to create a more robust solution to prevent SLA penalties from frequent system failures.
- Exhibited increasing expertise in constructing the Animate/Fuse GUI ETL tool and web portal by providing training to the production support team.
- Automated inbound data back-out process request and documented standard operating procedures, reducing client costs.

Aon Hewitt Associates, Lincolnshire, IL **01/2005 – 11/2006**
Systems Configuration Analyst **1 year 11 months**

- Awarded cash prize and certificate of excellence for playing a vital role in the success of retiree split family implementation project, achieving 98% transaction accuracy and 95% in customer satisfaction during Annual Enrollment.
- Nominated for Superstar Award for facilitating the actuarial valuation project in accordance with SDLC by actively participating in all phases of query-based extraction and reporting of retiree population.
- Developed comprehensive integration test plans for message extraction and triggering of AccessDirect IVR system, preventing several failures during client acceptance testing.
- Efficiently executed responsibilities surpassing team expectations and minimizing my mainframe system costs while meeting deadlines.

PROFESSIONAL TRAINING

Teradata Education Network, Virtual Class **2015-16**
Teradata Physical Database Design
Explaining the EXPLAIN Webcast

PR3 Systems, Aurora, IL **2013**
DataStage Essentials

Acxiom Learning Management, Downers Grove, IL **2010**
Oracle 10*g* Advanced SQL Programming

Oracle University, Chicago, IL **2004**
Oracle9*i* Database Performance Tuning
Oracle9*i* Database Administration (DBA) Fundamentals I *and* II
Introduction to Oracle9*i*: SQL

EDUCATION

DePaul University, Chicago, IL **2003**
M.S., Information Systems (with Distinction), GPA: 3.95/4.00

Group Projects
- Conceptual, logical, and physical database design of textbooks ordering system
- Design and development of B2B Extranet with message-oriented middleware
- Analysis, design, and implementation of B2C e-Learning Web site
- Analysis, design, and testing plans of Web-based travel expense system
- Application of data mining algorithms on medical data to detect heart disease

University of Manchester Institute of Science & Technology, Manchester, UK **1999**
B.S., Management (with Honors)

PROFESSIONAL ASSOCIATIONS

Upsilon Pi Epsilon (UPE) Delta Chapter of Illinois Member **2003-2007**

Association for Computing Machinery (ACM) Student Member **2003-2005**
