Senior Software Engineer

Summary

I'm a Sr. Software Engineer with 8 years of experience in design, development, testing and implementation of various web applications. Experienced with all stages of the development cycle for dynamic web projects, specializing in full-stack development. Proficient in a wide range of programming languages and technologies, with a strong track record of delivering high-quality projects on time and within budget.

Skill Highlights

❖ JavaScript(ES5/ES6, jsGrid) ❖ TypeScript ❖ Ajax/HMTL/CSS/Bootstrap ❖ React.js ❖ Angular 8, 9, 10, 12, 14 ❖ Redux ❖ NextJS/Gatsby ❖ Vue.js/Vuex ❖ Node.js/Express ❖ NPM, Gulp ❖ Material Design	❖ Python/Django ❖ Java ❖ C#/.NET ❖ Git/Gitlab ❖ Jest/Cypress ❖ AWS(EC2, ESC, Lambda)/Azure ❖ Storybook ❖ RESTful/GraphQL ❖ DevOps(CI/CD) ❖ Salesforce/Apec Classes/Visualforce ❖ GCP

Experience

Senior Software Engineer 8/2023 – 2/2024
Healthcare.com, Remote

- Successfully delivering a complex e-commerce platform using Angular, Next.js, and Node.js, featuring real-time updates, seamless navigation, and secure payment processing.
- Worked on Offer-admin portal with JavaScript, TypeScript, Redux, and React Hooks for the frontend.
- Used .NET, C#, SQL Server, Azure and Docker for the backed development.
- Optimizing application performance by implementing server-side rendering with Next.js, reducing initial load times and improving SEO rankings.
- Handled the delete advertiser functionality for both UI and API integration for creating the advertiser.
- I handled the unit test for all completed PRs and refactored unit test files in the whole project.
- Designed and developed .NET applications using C# and ASP.NET.
- Designing and deploying RESTful APIs with Node.js, enabling seamless integration with frontend components and supporting a scalable backend architecture.
- Implementing a custom authentication and authorization system using JWT tokens and OAuth, enhancing security measures and user access control.

Senior Software Engineer 3/2023 – 8/2023
BlueSky Commerce, Remote

- Built and updated some high-quality for dynamic resizing of websites with JavaScript, TypeScript, Redux, and React Hooks.
- Implemented Unit test using Jest in the React Components, and guaranteed 100% test coverage.
- Maintained J2EE legacy applications based on in-house monolithic architecture, and assisted in planning, development and migration of existing legacy web applications to microservice-based architecture, utilizing Spring MVC and Angular 14 component-based frameworks,

- Built and deployed Java applications on JVM, ensuring compatibility with various Java versions and managing dependencies using build tools like Maven and Gradle.
- Provisioned and configured AWS EC2 instances to host web applications and databases, ensuring optimal performance and security.
- Built and maintained EC2 instances running various operating systems, including Linux and Windows, to support diverse application requirements.
- Build robust, flexible, and data-efficient systems, contributing to the success of projects and the satisfaction of end-users using GraphQL.

Senior Frontend Developer 10/2022 – 3/2023
USDM, Remote

- Designing and implementing responsive and interactive user interfaces using Angular for the frontend, leveraging Next.js for server-side rendering, and Node.js for backend API development.
- Developed responsive and user-friendly web applications using Angular 12, React, and TypeScript.
- Created a responsive e-commerce website using Angular 12 and integrated it with a backend API to handle product catalog, shopping cart, and payment processing.
- Developed a real-time chat application using Angular 12, Firebase, and Socket.io. Implemented features such as user authentication, message encryption, and chat room management.
- Created a responsive e-commerce website using Vue and integrated it with a backend API to handle product catalog, shopping cart, and payment processing.
- Designed and implemented containerized applications using AWS ECS, orchestrating Docker containers for efficient deployment and scaling.
- Worked with JS Grid, a JavaScript library for creating dynamic, feature-rich data grids and tables in web applications. I've used it to efficiently display, edit, and manage tabular data, implementing functionalities like sorting, filtering, pagination, and custom cell rendering.

Software Engineer 12/2021 – 10/2022
Nextzen Software LLC, Remote

- Developed responsive web pages for desktops, tablets, and mobile using modern JavaScript technologies including React, Angular 8, Vue, JavaScript, HTML, Tailwind CSS and TypeSctipt.
- Researched and implemented best practices and emerging trends in Angular development.
- Designed and developed reusable Angular components and services for efficient development.
- Implemented new features and resolved bugs using Angular 8, JavaScript, and related technologies.
- Development of server side software using .NET, Entity Framework, C#, ASP.NET MVC5, jQuery, Bootstrap, and SQL Server.
- Implementation of user authentication and authorization between multiple systems, servers, and environments using JWT standards, Auth0, etc.
- Worked with Tailwind CSS/Storybook based on Figma design for FE, and created complete CI/CD pipelines using Jenkins and implemented a unit testing in the React project.

Full-Stack Developer 06/2019 – 12/2021
COLLEGE H.U.N.K.S, Remote

- Implemented all aspects of the web development process, including UI development, API integration, deployment and testing tasks using React, Redux, Node, Express, MongoDB, and RESTful APIs.
- Responsible for developing and customizing Salesforce applications using Apex, Visualforce, JavaScript, SQL, SOAP and REST Web Services
- Developed Visualforce pages for the customer portal using Visualforce templates developed Visualforce components as part of the customer portal customization.
- Experienced in working with various Python Integrated Development Environments like NetBeans, and PyCharm.
- Utilized Python, Django, jQuery and Java to design server applications and client interfaces.
- Managed continuous maintenance and troubleshooting of Python Django projects
- Deployed cloud functions (written in Node/Typescript) to handle events triggered by changes in our Cloud Firestore database.

Frontend Developer 11/2018 - 06/2019

1-800-GOTJUNK, Charlotte, NC

- Collaborated with a 9-person scrum team of developers/designers to implement a UI/UX design for a platform for green-conscious users. The app was a custom RESTful application that uses useContext, flexbox, validation, sort, and search functionality.
- Designed and developed professional Web applications using HTML5, JavaScript, React, Vue, Vuex, TypeScript, LESS, Redux, ES6, Node, and MongoDB.
- Cooperated with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Utilized JavaScript, TypeScript, HTML, JSON, and CSS to design and deploy the company website with integrated Web Service APIs for QuickBooks and open-source scheduling applications.
- Used Java/J2EE technologies to develop web applications for client sever environments and added functionalities to existing applications.

Frontend Developer 09/2016 – 04/2018

JP LOCAL LAWN CARE, Charlotte, NC

- Created a custom RESTful application with React that allows users to track points of an employee against a time and attendance policy. The application features authentication using JWT, Material-UI Table/Icons, flexbox, and CRUD functionality.
- Communicated with end-user to understand workflows, processes, and data collection within each integrated application as they relate to system design and migration decisions that support the project functions and goals, and maintained/Added REST APIs leveraging Node.js/Express.js.
- Established a standard Git Workflow among all the development teams which allowed us to work on multiple features at the same time while doubling the number of releases we did per month.
- Experience in design and development of web-based applications using Java, JDBC, SQL, Servlets, JSTL, JSP, XML, Java-API and Spring.
- Revamped various Java applications developed with Spring Boot, Hibernate and J2EE.

Education

- University of North Carolina at Charlotte – Coding Bootcamp, Jul 2020 – Oct 2020
- freeCodeCamp, Computer Science, Jul 2014 - Oct 2015
- High School Diploma – 2003 – Kissimmee High School, Kissimmee FL

Certification

- Full-Stack Web Developer, 2020
